

# WE CAN HELP YOUR SENIOR CLIENTS FEEL SAFER WHEN LIVING ALONE.

For over 125 years, ADT has been the nation's leading electronic security services company. Now we can provide invaluable assistance for the seniors you serve.

To help your senior clients live more independently in the comfort of their homes, consider ADT® Companion Services®, a service offered by ADT Security Services, Inc. since 1978. Companion Services is a Personal Response System (PRS) program that can provide 24 hour monitored assurance for seniors.

If a medical emergency occurs, your client can alert our ADT Monitoring Center at the touch of a button. Then we can respond by calling to dispatch an ambulance or by notifying a relative or a neighbor. The Companion Services program is round-the-clock protection that can help give your clients the confidence to remain independent — and in their own homes. And when your clients feel better, you'll feel a lot better about the job you do.
