

# Bio-Wipe Containment Bags

## The Chemo Bio-Wipe Bag™

The Chemo Bio-Wipe Bag™ helps protect against the transmission of possible infectious agents to the user at the site of the required cleanup. When the bag is turned inside out, the adhesive strip is removed and the top of the bag rolled over. Hazard is now sealed inside the bag.

The Chemo Bio-Wipe Bag™ provides temporary containment of infectious waste for proper disposal into an approved OSHA and/or ASHP container.

## The Bio-Wipe Bag™

The Bio-Wipe Bag™ is a patented opaque plastic bag on which the outside surface incorporates a super absorbent material that can be used to wipe up and contain infectious or contaminated spills when protective gloves are worn.

The Bio-Wipe Bag™ has a convenient two-thumbed inner mitt for right or left handed use.

The Bio-Wipe Bag™ is recommended for hospitals, emergency response personnel, food/restaurant industries, chemotherapy clinics and some select areas of industrial spill cleanup.

## The Mess-Up Mitt™

The Mess-Up Mitt is ideal for cleanup of small aqueous, oil or non-threatening chemical spills. Available on a roll of 25 perforated invertible wipe and containment bags for small industrial spills. Stronger than ordinary wipes and can be used more than once.

The Mess-Up Mitt features a bonded sorbent material for quick and easy cleanup of most aqueous solutions, oils and chemicals.

It is a great mitt for equipment wipe-downs. Two at a time increases labor efficiency.

### Use Instructions:

1 Open The Bio-Wipe Bag™ and insert already gloved hand (right or left) into mitt.

2 Wipe spilled substance with absorbent side of The Bio-Wipe Bag™.

3 Turn bag and absorbent substance inside out to contain the spill.

4 Peel the adhesive strip, fold top of bag over, seal, and dispose of in a properly labeled biohazard container.

## Safety Spill Kit

The Mini One & Done Safety Spill Kit™ is a convenient wipe and containment bag all-in-one. This kit comes in a 5" x 7" plastic bag for portability.

### Kit Contains:

- 1 - Bio-Wipe Bag™
- 1 - Pair of Large Nitrile Gloves
- 1 - Anti-Microbial Hand Wipe
- 1 - Surface Disinfectant Wipe
- 1 - Large Towelette

All contents of the kit can be deposited and sealed inside "The Bio-Wipe Bag"™ upon completion of spill cleanup.
